

Do you know someone at risk of overdosing on **Opioids?**

- **Narcan**(Naloxone) is a life saving medication that can reverse an opioid overdose by blocking opioids receptors from attaching to opioid receptors in the brain.
- Is administered as a nasal spray.
- There are NO side effects.
- **Narcan** is active for about 30 to 90 minutes in the body—giving enough time to seek emergency medical care.

Narcan at Manet

Narcan is **available for anyone** to have on hand in case they witness an overdose.

Manet's **Prevention Specialists** can be reached at 857-939-4108. A **Prevention Specialist** can teach you how to use Narcan and supply this medication to you free of charge.
