

Braintree Town Council

ORDER NO: 14 063

DATE FILED: SEPTEMBER 26, 2014

REQUEST OF: NATIONAL GRID

National Grid hereby respectfully requests your consent to the locations of mains as hereinafter described for the transmission and distribution of gas in and under the following public streets, lanes, highways, and places of the Town of Braintree and of the pipes, valves, governors, manholes and other structures, fixtures and appurtenances designed or intended to protect or operate said mains and accomplish the objects of said Company; and the digging up and opening the ground to lay or place same:

To install and maintain approximately 1150 feet, more or less of 2 inch gas main in Sycamore Road, Braintree. From the existing 2 inch gas main at house #27, easterly to house #121 to serve houses #81, #90, #91, #101, #110, #111 and #121 with the following conditions:

BELD: Engineering has reviewed petition #14 063 Sycamore Road. Please be advised there is a 15kV underground circuit within the proposed scope of work. This is a concrete encased line to be identified and marked through the Digsafe notification process. Additional drawings and information can be issued through the BELD Engineering Department.

DPW: This street is not under moratorium and no Town construction is pending this year. The streets in this area are tentatively programmed for the next three-year "100 Roads Program" to begin in 2017. We'd recommend that the petition be granted under the normal conditions, with emphasis on the requirements that the gas main be laid outside of the trench of the water mains in service and that the trench pavement not be left low for any length of time. We also recommend that the following requirement be added to the permit, if it is to be granted:

Neither National Grid nor any of its contractors is authorized to close any street or to close a direction of travel to facilitate their work without authorization from the Director of the Department of Public Works or the Highway Superintendent. The Chief of Police can also authorize a closure for a police or fire emergency. Construction zone traffic safety issues are to be addressed by using appropriate traffic control signs and devices and the use of police officers for traffic control to safely guide traffic through the work zone. If a closure is authorized by the DPW, it shall not be implemented until signs and police officers (where needed) are properly in place in conformity with the written plan prepared by the contractor's engineer and approved by the DPW and Police Department.
